PROFILE

I am a junior interface developer with the following qualities: collaborative, meticulous, thoughtful, diligent, always on the lookout for new knowledge.

I have 10 pet projects in my portfolio, among them there are one-page and multi-page sites with functionality (film collection, weather forecast, todo list, Gem Puzzle) and simple layout. Almost all designs are responsive or responsive.

I am currently taking a course at RS School. There I worked a bit with Node.js and consolidated my knowledge in JavaScript. I learned to understand someone else's code and complete tasks within strictly set deadlines.

I am considering any offers for an internship or employment as a Frontend developer.

SKILLS

- **FrontEnd** Coding
- Familiar with creating extensions for Joomla
- Basic knowledge of **Photoshop** and **Figma**
- Fast learner
